

An aerial photograph of a multi-lane highway interchange situated in a lush, green valley. The highway curves through the landscape, with several vehicles visible on the road. In the background, a city skyline is visible through a hazy atmosphere. The foreground is framed by the branches and leaves of trees, suggesting a high vantage point from which the photo was taken.

CUNDALL

Project Guidebook

Our purpose

Cundall exists to create:

The best opportunities for our people and sustainable solutions for the planet

Cundall is a global, independent, multi-disciplinary consultancy delivering sustainable engineering and design solutions across the built environment. Thought leadership is a key element of our business.

We are continually engaged in self-evaluation to measure and manage our impact on, and contribution to, both industry and planet.

A wide-angle photograph of the Royal Adelaide Hospital at dusk. The building is a modern, multi-story structure with a prominent glass facade that reflects the twilight sky. A section of the building features a decorative facade of blue and white mosaic tiles. The name "Royal Adelaide Hospital" is visible on the upper part of the building. In the foreground, there is a landscaped plaza with concrete walkways, wooden benches, and young trees. The sky is a soft mix of blue and orange from the setting sun.

Projects delivered in Australia

We understand that every successful project requires the experience not only to see what is directly ahead, but to anticipate the landscape of possibilities, and respond proficiently to whatever comes along - pairing precision of process with creative thinking outside the box.

Royal Adelaide Hospital, Adelaide, Australia © Mark Zed
